

2020 Popcorn Sale

Covid-19 Safety Protocols

Stay Safe while Selling Popcorn

General

We have created the following guidelines using information published by the Center for Disease Control (CDC) and US Food & Drug Administration (FDA). We have introduced these protocols for any unit selling product at or near a retail establishment.

- Policies and procedures outlined in the 2020 Popcorn Code of Conduct must be followed for popcorn sales.
- Confirm you understand protocols as presented by your unit.
- **Masks Required** - Facial coverings (masks) are required to be worn when in and indoor or outdoor public spaces. This includes Door-to-Door and Storefront Sales.
- **Wash or Sanitize Hands** - Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing. If soap and water are not readily available, use a hand sanitizer.
- **Disinfect Surfaces** - Clean and disinfect frequently touched surfaces. This includes tables, laminated order forms, phones, Square readers, pens, etc.
- **Social Distance** - Keep 6 feet of distance between yourself and people who don't live in your household. Remember that some people without symptoms may be able to spread the virus.
- **Stay Home** - Please have all popcorn sale participants review the Popcorn Sale Medical Screening Checklist prior to any storefront sales. Scouts, families and Leaders should take appropriate action and stay home if you are sick.

Storefront Process/Set-up

- One Adult to check-in with vendor.
- Use pictures/posters or ONE of each product for display. These same specific containers should be used for all shifts. Cover samples with clear plastic. Use a second table in front of the display to provide separation of customers from displayed items.
- Enable social distancing. Establishing lines or marking for patrons to enable them to stand at least 6ft apart.
- Hand sanitizer (minimum 60% alcohol) available on site for volunteers and customers.
- Product for store front sales come from the Unit inventory and not from inventory given to individual scouts.
- If scouts/adults get permission to use bathroom facilities; 20 second handwashing procedures with soap must be used.
- Preferably only consumer touches product by pulling from case. If the unit must pull, ensure hand sanitizer is used often.
- Please encourage credit card sales through the app. Have one adult handles all cash wearing gloves and using hand sanitizer often.
- Avoid touching eyes, nose, mouth with unwashed hands.
- Practice good respiratory etiquette - cover your cough.
